Kodak 5634DI aka RYOBI 3404XDI aka Presstek 34XDI

Gaining entry into the 4-color digital offset printing market is easier than you might think. Join the thousands of Presstek DI owners who know the high value a DI press brings the bottom line of a print business. Not only is the print quality outstanding and the press simple to operate and maintain, it has a low cost of ownership. Talk to our representatives about an ROI analysis specific to your business.

Our 34DI 4-color digital offset press is an extremely compact, efficient, high resolution printing system offering a low cost per page for your short-run printing needs. Owning a DI means you don't need to produce metal plates and you don't need to invest in a CTP system.

Compact V-Shaped Design

Presstek's DI imaging technology, combined with a central impression cylinder and single gripper system result in precise registration every time.

Waterless Printing

The Presstek DI's waterless printing design results in less waste, a wider color gamut, less dot gain, and enables you to get up to color fast so you don't have to waste time with unnecessary adjustments. You're saving time and resources without any compromises.

On Press Chemistry-Free Imaging and Automation

Presstek's patented thermal laser imaging technology means you don't have to worry about costly click charges or hazardous plate processing chemistry. With a Presstek 34DI, 4 spools of media are inserted into the press, then automatically tensioned, imaged, cleaned and advanced so you don't have to swap out media for 28 jobs!

Efficient Digital Workflow

The Presstek DI digital offset printing press integrates seamlessly into Macintosh and Windows workflows. Files are RIP'ed directly to the press; text, images and imposition can be checked on the DI's on-press monitor or by using a hardcopy proofing solution.

FEATURES

- Space-saving 4-color press requires just 3.8 m2 of installation space
- New plates automatically fed and mounted onto plate cylinder. Used plates are automatically transferred to take-up cassette
- Each ProFire Excel module images two printing plates in register
- Highly efficient, automatic plate cleaning provides print ready plates right after imaging
- Automatic ink key preset from ripped file information means quick set up and reduced waste
- Roller temperature is automatically maintained ensuring consistent quality throughout the day
- Infrared dryer allows reduced drying times and faster job turnaround
- Blanket, ink roller and impression cylinder cleanup is automatic
